

Figure 1 is a Kaplan-Meier survival plot showing the time to death for two groups: OS (Open Surgery, solid blue line) and EFS (Endoscopic Full-Spectrum, dashed orange line). The x-axis represents Time in days (0 to 4000), and the y-axis represents survival probability (0.00 to 1.00). The OS group shows a significantly better survival outcome compared to the EFS group, with a p-value of 0.43 for OS and 0.81 for EFS.
