

Figure 1 is a line graph showing the probability of a system being in a specific state over time (days). The x-axis represents Time (days) from 0 to 4000, and the y-axis represents probability from 0.00 to 1.00. Two data series are plotted: OS P = 1 (blue dashed line) and EFS P = 0.16 (orange dashed line). The OS P = 1 series starts at 1.00 and drops sharply to 0.00 around day 500. The EFS P = 0.16 series starts at 1.00, drops to approximately 0.85 by day 100, and then drops to approximately 0.72 by day 1000, remaining constant thereafter.

Time (days)	OS:no CPG P/LP	OS:CPG P/LP	EFS:no CPG P/LP	EFS:CPG P/LP
0	11	1	11	1
500	10	1	8	0
1000	9	0	6	0
1500	8	0	5	0
2000	5	0	2	0
2500	4	0	1	0
3000	4	0	1	0
3500	3	0	0	0
4000	3	0	0	0
